

**MAXIMIZING YOUR  
FACILITY'S ENERGY  
SAVINGS IN PREPARATION  
FOR RENEWABLE ENERGY**

November 2, 2021

**20** years of saving energy for  
**Wisconsin.**

# Presenters

Chris Seitz,  
Energy Advisor

Andy Wegner,  
District B&G Operations Manager  
Mukwonago Area School District

# What does Focus on Energy do?

- Assists Wisconsin residents and businesses in identifying and implementing energy efficiency projects
- Offers unbiased third-party information and technical assistance to participating utilities' electric and/or natural gas customers
- Provides financial incentives for energy-saving projects that would not otherwise occur

# Mission

- Empowers the people and businesses of Wisconsin to make smart energy decisions with enduring economic benefits

# Benefits of Focus on Energy

Expert Energy  
Advisor support

Energy team  
coordination

Training  
facility staff

Improving return  
on investment

Supporting student/  
consumer energy education

# Economic impact

- For every \$1.00 invested, Focus on Energy creates more than \$5.00 in benefits for the state of Wisconsin
- A study of statewide energy efficiency programs by the Berkeley Lab found Focus on Energy runs the most-cost-effective in the nation
- Visit [focusonenergy.com/evaluation-reports](https://focusonenergy.com/evaluation-reports) to view the full report

# Agenda

- Benefits of Solar Power in Schools
- Preparing for Renewable Energy
- Solar PV Starting Steps
- Success Story: Mukwonago Area School District
- Potential Energy-Saving Opportunities
- Resources and Technical Assistance

# Benefits of Solar Power in Schools

# First U.S. solar panel to produce energy

Photo: Smithsonian Magazine

# School district solar PV installation

# Offset energy bills

- Over **7,300 schools in the U.S.** have solar installations
  - Wisconsin ranks **#12** in the nation with 148 schools with solar (The Solar Foundation)
- Dramatic decline in costs make solar options widely accessible
  - Average cost of solar panels per watt in Wisconsin is **\$2.83/watt** (Solar-Estimate)

Photo: WPR

# School energy use

Commercial Buildings Energy Consumption Survey (CBECS), 2016

# Ideal candidate

- Schools include underutilized spaces
  - Facility structures offer a large, flat area ideal for solar rooftop systems
  - Parking lots have space for photovoltaic canopies to capture the sun
  - Vacant land provides an opportunity for a solar farm to maximize energy output

# Types of solar options

- Roof-mount
  - Common option requiring minimal maintenance
- Pole-mount
  - Option when roof space is limited
  - Requires adequate land space
- Ground-mount
  - Large areas of land with ample sun exposure
  - Generate more power than roof system

# Enhance educational opportunities

- Provides an on-site learning experience
- Allows students to learn about real-world energy issues
- Gives students the ability to track data through monitoring systems
- Motivate students to explore careers in energy conservation and sustainability

Photo: Macsteller-Energy

# Preparing for Renewable Energy

# Benchmarking

- Monitor your energy usage by benchmarking electricity and natural gas using ENERGY STAR®
- What is your energy profile?
  - Spring
  - Summer
  - Fall

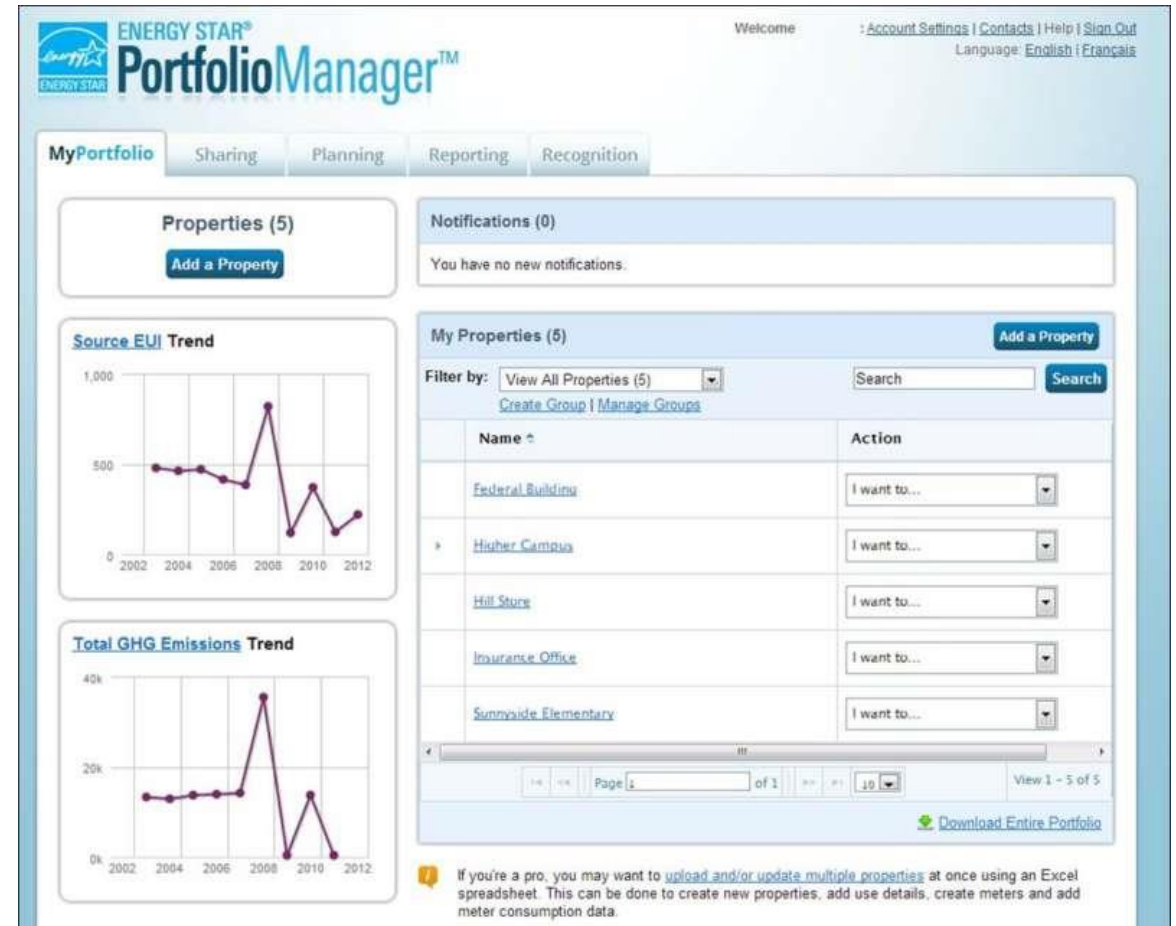

Photo: ENERGY STAR®

# Submetering

- Start with metering main utility meters
  - Electric meter pulses provide 15-minute demand data
  - When are peaks happening?
- What should be submetered?
  - Chillers
  - Cooling equipment for large spaces like gymnasiums
  - PAC – rental information
  - Kitchen equipment
- 15 min demand average data – WE Energies

Photo: Setra Systems

# Pursue energy efficiency upgrades first

- Upgrade facilities to be energy efficient to reduce the size of the renewable energy system
- Improve new and existing buildings in three primary areas
  - Lighting systems and controls
  - Mechanical systems (heating, cooling, ventilating and water heating equipment) including operation and maintenance
  - Building envelope (walls, floor and roof)

# Utilize your Energy Advisor

- Invite your Energy Advisor to facility planning meetings
  - Provide expertise and advice
  - Strategize and brainstorm solutions
  - Assess building needs

Photo: Freepik

# Getting Started with Solar PV

# Seek solar energy consulting

- Explore solar energy options with a trained professional
- Evaluate
  - Utility rate structure
  - Net-metering agreements
  - Interconnection requirements
- Utilize this information to determine the size of your renewable energy system
  - Cost/benefit analysis
  - Additional ROI calculations

Photo: Proche

# Realize available funding mechanisms

- Contact your local utility for renewable energy programs and incentives they offer
- Research available incentive funding from Focus on Energy and State Energy Office Funds
- Explore fundraising opportunities and private donations

Photo: Freepik

# Pro tips

- Large scale battery storage is available but expensive
  - Prices will go down
- Systems can be sized to sell energy back to the utility
- Determine buyback rate for your utility
  - Utility buyback rates can be low
  - Average commercial rate in Wisconsin is **\$0.11/kWh**

Photo: Energy Central

# Pro tips

## WE Energies Rate Schedule CGS NM

### Customer's Buy-Back Energy Rate:

Residential and secondary customers on a flat rate:

All Energy (flat rate, all hours) \$0.04245 per kWh

### Residential and secondary customers on a time-of-use rate:

All on-peak energy, per kWh  
All off-peak energy, per kWh

#### Summer

\$0.05714  
\$0.03876

#### Non-Summer

\$0.04608  
\$0.03836

### Primary Customers:

#### Summer Energy Rate

All on-peak energy, per kWh \$0.05572  
All off-peak energy, per kWh \$0.03780

#### Non-Summer Energy Rate

All on-peak energy, per kWh \$0.04493  
All off-peak energy, per kWh \$0.03741

Equal to or  
Less than  
12,470 volts

Greater than  
12,470 volts  
and Less than  
138,000 volts

Equal to or  
Greater than  
138,000 volts

# Prescriptive incentives

- Incentives available as of October 4, 2021
- Steps to participate
  1. Verify your utility participates
  2. Check status of available incentives
  3. Find a Trade Ally and ensure solar system meets requirements
  4. Complete online reservation application
  5. Complete installation
  6. Fill out incentive application

| Multifamily and non-Residential Incentives – 0 to 100 kW |             |
|--|-------------|
| Total Budget   | \$1,250,000 |
| Paid/Entered/Reserved                                    | \$1,098,089 |
| Remaining  | \$151,911   |

| Multifamily and non-Residential Incentives – 100 to 300 kW |             |
|--|-------------|
| Total Budget   | \$1,450,000 |
| Paid/Entered/Reserved                                      | \$1,196,651 |
| Remaining  | \$253,350   |

| Multifamily and non-Residential Incentives – 300+ kW |             |
|--|-------------|
| Total Budget   | \$1,300,000 |
| Paid/Entered/Reserved                                | \$1,098,997 |
| Remaining  | \$201,003   |

# Success Stories: Mukwonago Area School District

# Lighting and Cooling Upgrade

# Background

- In 2015, Mukwonago Area SD upgraded lighting and DX cooling
- Benefits include improved occupant comfort and saved energy
- Projects were completed over four years through 2018

# Energy savings

- Annual kWh savings
  - **137,515 kWh**
- Annual utility bill savings
  - **\$15,127 per year**
- Focus on Energy incentive
  - **\$22,191**

# Solar Panels Upgrade

# Background

- In 2019, Mukwonago Area SD was interested in installing solar PV to offset energy use
- Worked with their Trade Ally contractor and the Office of Energy Innovation (OEI) to obtain financial incentives
- Financial incentives covered **50% of project costs**

# Project scope

- Mukwonago installed solar panels on the high school
- Installed **930 panels** at **355 watts** each
- Total system production of **330 kW**

# Solar PV kWh portal

## SUNNY PORTAL & SMA Smart Connected

<https://ennexos.sunnyportal.com/2472408/dashboard>

# Solar PV kWh portal

## AlsoEnergy

<https://apps.alsoenergy.com/Account/Login?returnUrl=%2fpowertrack>

# Energy savings

- PV watts calculator estimated annual energy produced
  - 467,347 kWh
  - Almost 2/3 of both school's energy requirement
- Annual utility bill savings
  - \$56,000 per year
- Estimated payback
  - 7 years
- Staff, students and community can view energy data in real time online

# Potential Energy-Saving Opportunities

# Prescriptive incentive projects

- Specific dollar amounts for installing qualifying energy-efficiency equipment
- One-for-one replacement for commonly installed equipment
- Visit [focusonenergy.com/catalogs](https://focusonenergy.com/catalogs) to view current Incentive Catalogs
- Customer has 60 days after project installation to submit application and invoice(s)

# Custom incentive projects

- Eligible for non-standard technologies or projects that are not a one-for-one replacement
- Incentive based on estimated first year energy savings associated with a project or technology
- Work with your Energy Advisor to receive pre-approval prior to starting project

# Custom incentive projects

- 2021 Incentive rates:
  - \$0.05 per kWh saved
  - \$100 per peak kW reduced
  - \$0.95 per Therm saved
- Project must have a simple payback of 1 – 10 years
- Incentives cannot exceed 50% of the project cost
- Maximum incentive of \$300,000 per project
- Customer maximum of \$400,000 per year

# Comprehensive Lighting Solutions (CLS)

- Transform your facility by optimizing your interior lighting system
- Offers two ways to save
  1. Fixture or retrofit kit upgrades
    - \$0.25/Watt Reduced
  2. Fixture or retrofit kit/lamp upgrades with connected controls
    - \$0.45/Watt Reduced
- Contact your Energy Advisor or Trade Ally to review your facility's lighting requirements

# Fixture or retrofit kit upgrades

- Used when redesigning a space
- Number of fixtures per room must change
  - One-for-one fixture/retrofit kit replacements are **NOT eligible**
- Utilize Focus on Energy's CLS workbook available at [focusonenergy.com/CLS](https://focusonenergy.com/CLS)
- Fixtures and/or retrofit kits must be DLC listed
- **Must be pre-approved**
- Complete project incentive documentation and submit within **60 days** of project completion

# Fixture or retrofit kit/lamp upgrades with connected controls

- Utilize Focus on Energy's CLS workbook available at [focusonenergy.com/CLS](https://focusonenergy.com/CLS)
- Fixtures, retrofits kits/lamps and controls must be DLC listed
- **Must be pre-approved**
- Complete project incentive documentation and submit within **60 days** of project completion

# Connected controls

- Systems must have these features in order to receive a financial incentive
  - Individually addressable
  - Zoning
  - Occupancy sensing

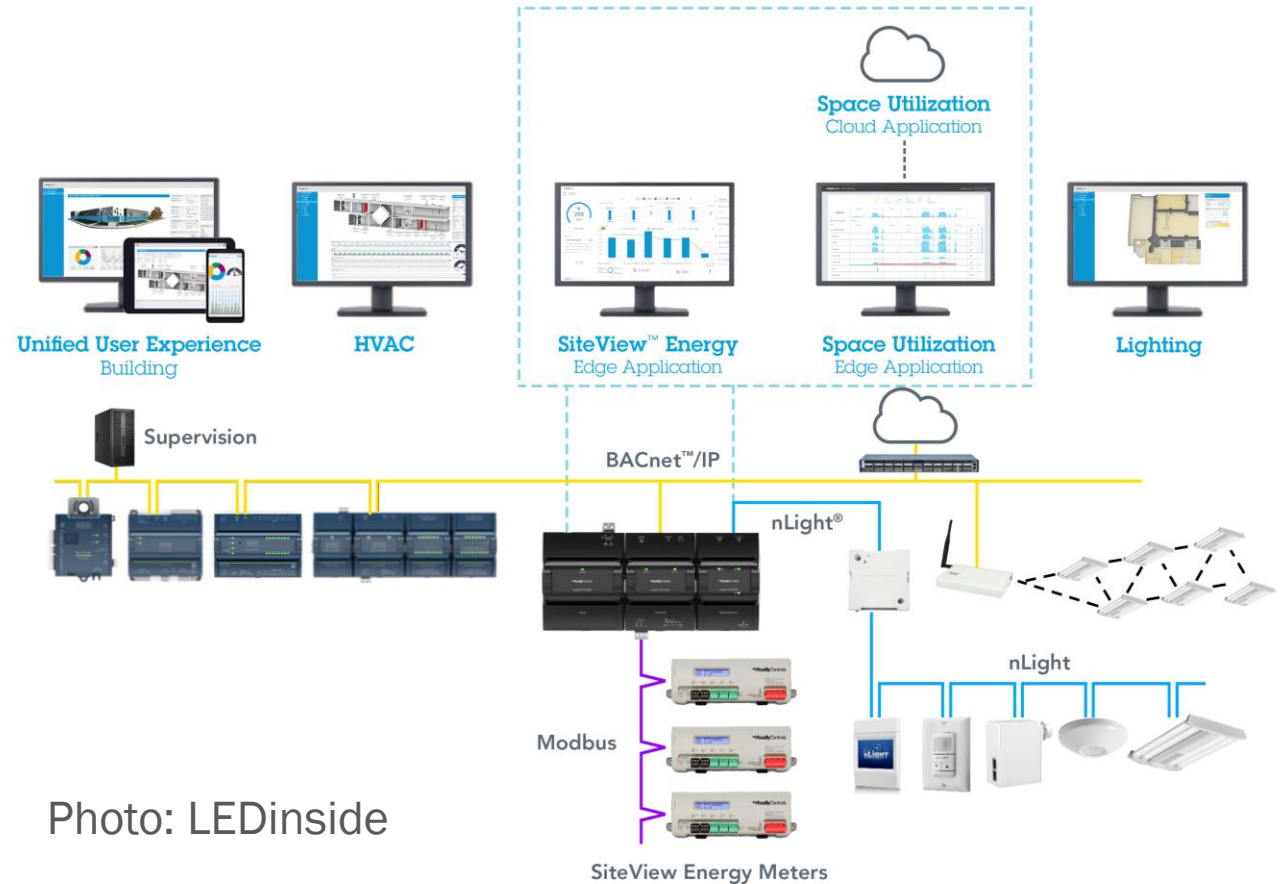

Photo: LEDinside

# Real-time energy monitoring competition

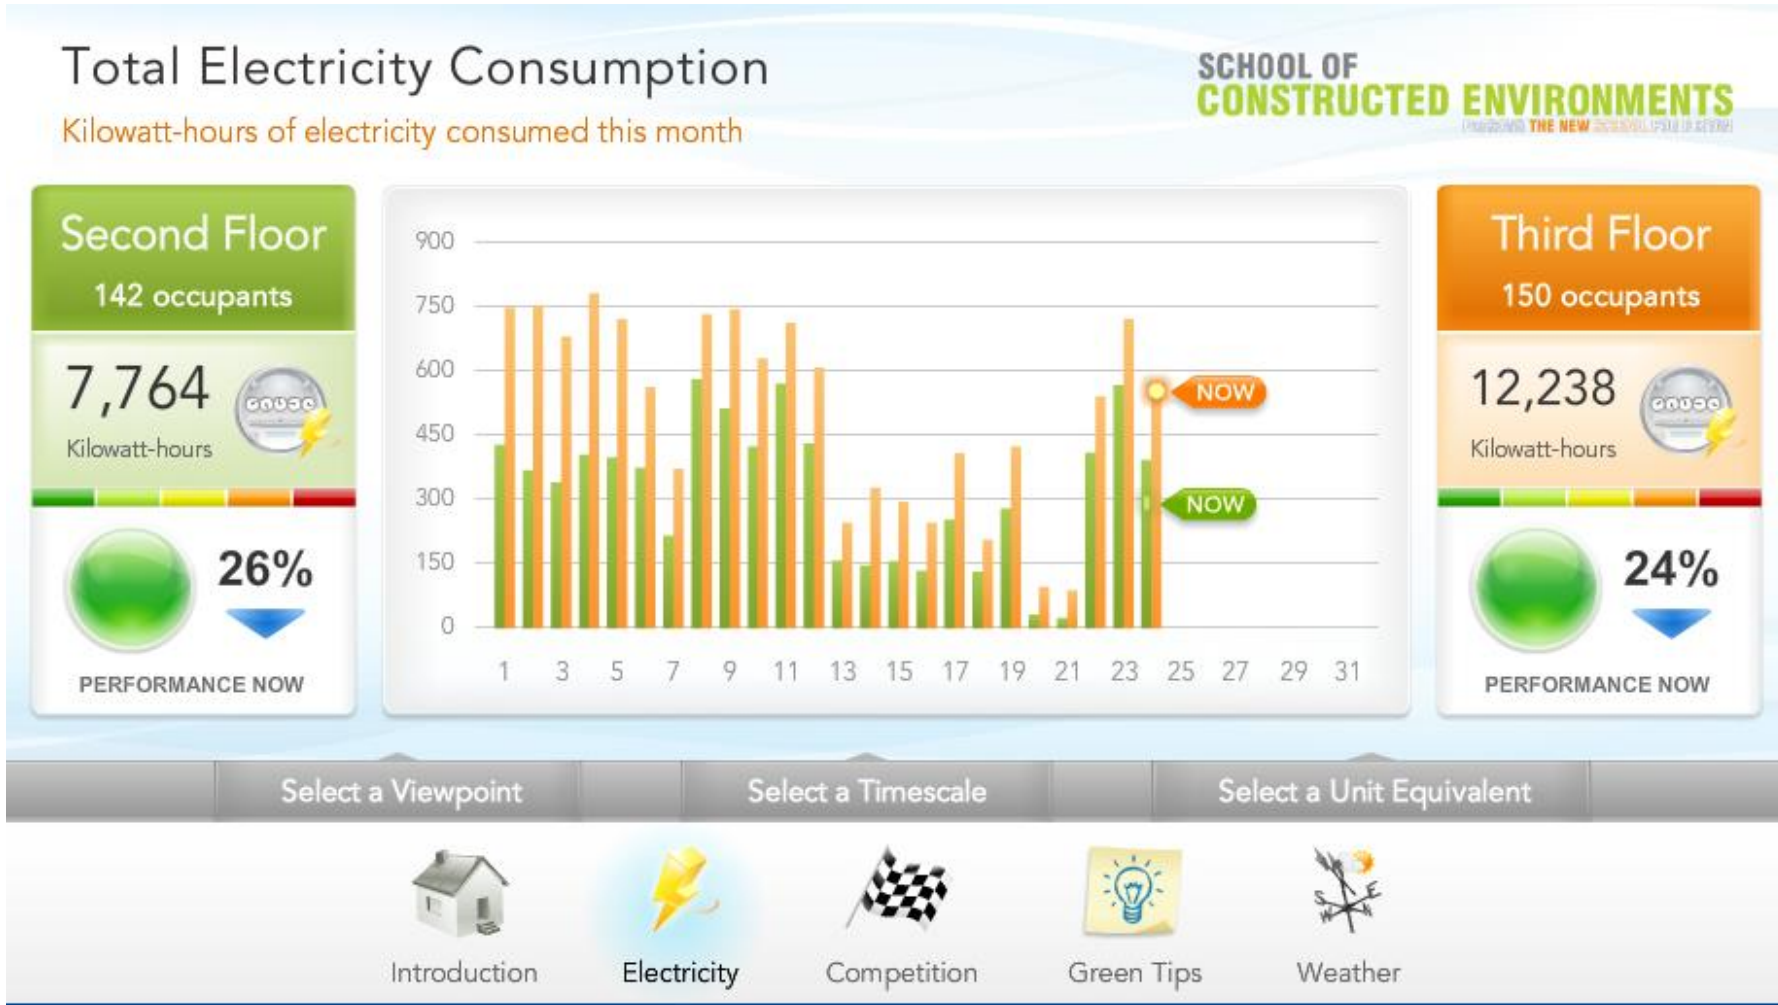

Photo: School of Constructed Environments

# Retrocommissioning (RCx)

- Improves the performance and energy efficiency of existing building systems, equipment and operations
- Save up to 16% each year on energy bills using RCx to implement system and operational changes
- **NEW in 2021**
  - Complete the audit and reduce energy use intensity (EUI) to receive a minimum base incentive of **\$0.10/ft<sup>2</sup>**
  - Additional incentives **up to \$0.10/ft<sup>2</sup>** are available for achieving higher than a **5% reduction in EUI**

# Energy recovery ventilation (ERV) systems

- Provide energy savings in mechanical ventilation systems
- Recycle energy from exhaust air to pretreat the incoming outside air/ventilation air
- Reduce the HVAC load while lowering the required capacity of the mechanical equipment
- Offer a cost-effective means to reduce energy consumption without reducing indoor environmental quality

Photo: Fanning Howey

# NEW! Direct fired make-up air units

- Available for replacing indirect fired make-up air units or new installations
- Financial incentives
  - Equipment upgrades/retrofits - **\$0.20/CFM**
  - New construction/major renovations - **\$0.15/CFM**

Photo: Ventilation Direct

# Boiler tune-ups

- Financial incentive - **\$0.05/MBh**
- Trade Ally must perform before and after combustion efficiency tests for each boiler tune-up
- Separate application required for each unique job site
- Visit [focusonenergy.com/catalogs](https://focusonenergy.com/catalogs) to download an application

# Early completion bonus

- Receive **up to 25%** in additional incentives for projects completed between September 6 and December 10, 2021
- Offering details:
  - **25% bonus** – within 30 days of installation (no later than **November 15, 2021**)
  - **10% bonus** – within 30 days of installation (no later than **December 10, 2021**)
- Submit applications within **30 days** of project completion or by the specified date
- Visit [focusonenergy.com/business](https://focusonenergy.com/business) to review eligibility and how to apply

# Training and education

- Focus on Energy offers a variety of courses to meet energy efficiency educational needs
- Check out a full list of sessions at [focusonenergy.com/training](https://focusonenergy.com/training)
- Upcoming classes
  - **November 3:** Advanced Lighting Control System – Green Bay
  - **November 4:** Advanced Lighting Control System – Pewaukee
  - **November 9:** Energy Management and Technology: Fundamentals and Beyond

# Energy team toolkit

The cover of the Energy Team Toolkit brochure features a photograph of a diverse group of professionals in a meeting room. They are gathered around a table, looking at a large solar panel that is being presented. The background is a light-colored brick wall. The title 'ENERGY TEAM TOOLKIT' is prominently displayed at the top in white text on a dark teal background. Below the photo, there is a 'TABLE OF CONTENTS' section listing the pages and topics. At the bottom right, the logos for 'WISCONSIN' and 'focus on energy' are visible, along with the tagline 'Partnering with Wisconsin utilities'.

## ENERGY TEAM TOOLKIT

**TABLE OF CONTENTS**

- Pg. 2: Starting an energy team
- Pg. 3: Sample energy policy
- Pg. 4: Sample energy team meeting topics
- Pg. 5: Sample energy team meeting agenda
- Pg. 6-7: Successful energy teams
- Pg. 8: Six steps to improve energy efficiency

**WISCONSIN**

**focus on energy**  
Partnering with Wisconsin utilities

- Each toolkit includes:
  - A sample energy policy
  - Energy team meeting topics and agendas
  - Highlights from successful energy teams
- Download a free copy at [focusonenergy.com/toolkit](https://focusonenergy.com/toolkit)

# Energy best practices guide

- Outlines the basic steps in building an energy management program for school and government facilities
- Provides general best practices and recommendations
- Download a free copy at [focusonenergy.com/S&G-Guidebook](https://focusonenergy.com/S&G-Guidebook)

# FREE energy-efficient packs

- Save energy and money while improving your home comfort this winter
- Each pack contains a variety of product, such as:
  - LED light bulbs
  - High-efficiency showerhead
  - Water-saving bathroom faucet aerators
  - Pipe insulation
- Must be a customer of a participating Wisconsin utility company
- Complete your order online at [focusenergymarketplace.com/free](http://focusenergymarketplace.com/free)

Thank You.
